

Roof Lantern

1 Make sure you are equipped with all tools and rooflight for installation.

Check for any damage upon delivery.

2 Check that the upstand is the correct size and is constructed correctly.

3 Clean and dry upstand so that the sealant can adhere properly for weather sealing.

4 Check that the upstand is level and square using packers where needed so the correct level is achieved all the way around.

5 Carefully unpackage the corner protectors on the lantern / pyramid.

6 Apply a 10mm high bead of compatible sealant to the top edge of the upstand all the way around.

7 Carefully lower the lantern / pyramid into position pressing down firmly for a tight seal.

8 Carefully remove glass protection film.

9 Screw the lantern down through the holes provided making sure not to over tighten the screws. Do this all the way around the Roof Lantern.

10 You have now successfully installed your frameless roof lantern / pyramid.
